

601 602 Marine Repair Kit A & C.

Resimac Marine A & C kits are epoxy resin and GRP/ glass fibre based repair kits designed for encapsulating and sealing problem pipe work on board vessels.

The marine kits use an innovative epoxy gel which is then used in conjunction with tightly woven glass fibre tape to create a strong flexible layer of GRP/ glass fibre around pipes ranging from 25mm/1" to 1050mm/42" diameter.

The system requires minimal surface preparation and is solvent free, therefore making it suitable for confined space applications.

Features of the product include-

Solvent free—no odour

Repair any pipe diameter

Encapsulate long lengths of pipe

150°C/ 302°F temperature resistance

150psi pressure resistance on mechanically abraded surfaces

Suitable for metallic and GRP/ glass fibre pipe substrates

Bureau Veritas Approved

Benefits to the user include-

Cost effective solution

Simple and easy to use

Minimal surface preparation required

Proven track record in the marine industry
